**TITLE OF PROJECT**

Supporting fishing waste reduction and marine systems preservation in European islands and coastal ar

**Country:**

EU Member States

**Project Period:**

01/01/2022-31/12/2023

**Project Value:**

€ 274.100

**No of Staff Provided:**

4

**Origin of Funding:**

Erasmus+ Programme

**Name of Client/ Beneficiary:**

European Union Programmes Agency

**Description of Project:**

The project seeks to contribute to the reduction of marine debris that derives from fishery and aquaculture activities.

The project, in addition, will provide them with lifelong opportunities that otherwise will not be available.

Finally, the project will aim to increase the awareness of European citizens, local communities and stakeholders.

**Services Provided:**

The following will be implemented within the project:

- A transnational Report on the attitudes and knowledge of fishery and aquaculture workers on innovation.
- Training material to support local fishery and aquaculture workers in adopting sustainable practices.
- E-learning platform for supporting the training activities on blue sustainability.
- An awareness raising podcast series on fishing waste reduction and marine systems preservation.
- Policy Recommendation for the establishment of marine litter stations in ports of European Islands.
